- NEXUS a Hub for Innovation
- Title of the work
- Group Number
- Name of the participants

PHOTO OF THE PROJECT
(render, model, prototype, mockup, simulation, photography of the physical model)

RESEARCH:

- Problem analysis (data, statistics, trends)
- Context (urban, suburban, global, local)
- Critical issues in current mobility Benchmark (similar projects or existing solutions)

YOU CAN USE:

- Clear graphs
- Maps
- Diagrams
- Flowcharts
- Highlighted keywords

THE PROJECT

- Concept (basic idea)
- Technical operation (how does it work?)
- Structure / materials / technologies used
- How to use
- Sustainability aspects
- Technical drawings / sections / exploded views / functional diagrams

CONCLUSION

- What problem does it actually solve?
- Measurable benefits (time, costs, emissions, safety, accessibility)
- Future scalability
- Possible developments
- Social, environmental and economic impact
